Supply Price	The rate for the electricity supplied during the Fixed Rate Billing Cycles will be [REDACTED] per kWh. The rate for each subsequent billing period will be variable. IDT Energy considers numerous factors when setting its variable rates for electricity including, but not limited to, current conditions on the PJM wholesale electricity market, the cost of obtaining electricity from all sources, capacity costs, settlement costs, costs of ancillary services, hedging costs, balancing costs, line loss costs, costs to comply with any applicable Renewable Portfolio Standards, IDT Energy’s expenses and margins, and all applicable taxes, fees, or assessments.
Statement Regarding Savings	The supply price may not always provide a savings.
Options	If you have chosen the Renewable/Green Energy Supply option, IDT Energy will ensure that 100% of your electricity usage is matched with renewable energy certificates. [A renewable energy certificate is a tradable, non-tangible energy commodity that represents proof that 1 megawatt-hour (MWh) of electricity was generated from an eligible renewable energy resource and was fed into the shared system of power lines which transport energy]. IDT Energy may take up to 24 months from the end of each calendar year to address any deficiency in the renewable content of electricity sold under this Agreement during such calendar year. If you have chosen a Variable Rate electric product and the Renewable/Green Energy option, or if you chose a SmartBudget electric product with the Renewable/Green Energy option and the fixed-rate portion of your service has ended, your rate for the electricity supplied will be IDT Energy’s Variable Rate plus an “adder” of up to 3 cents per kWh. If you wish to cancel the Renewable/Green Energy Option, you may call IDT Energy at 1-877-887-6866.
